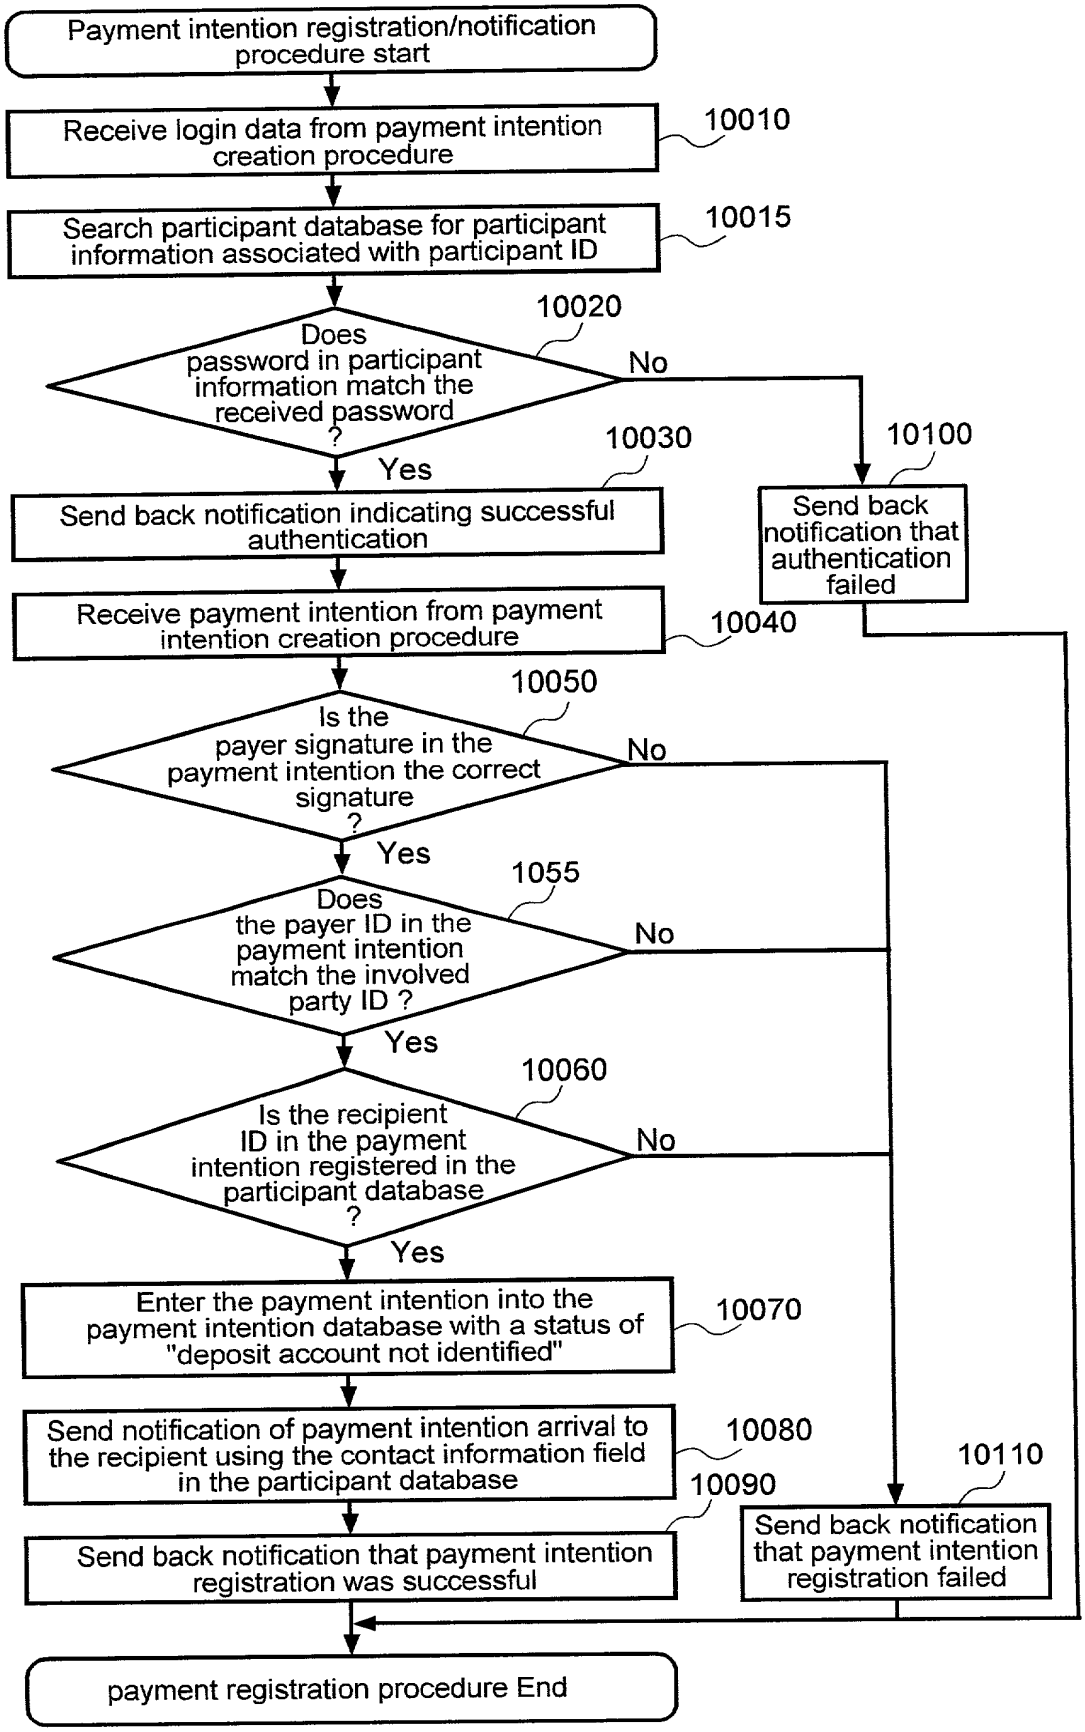
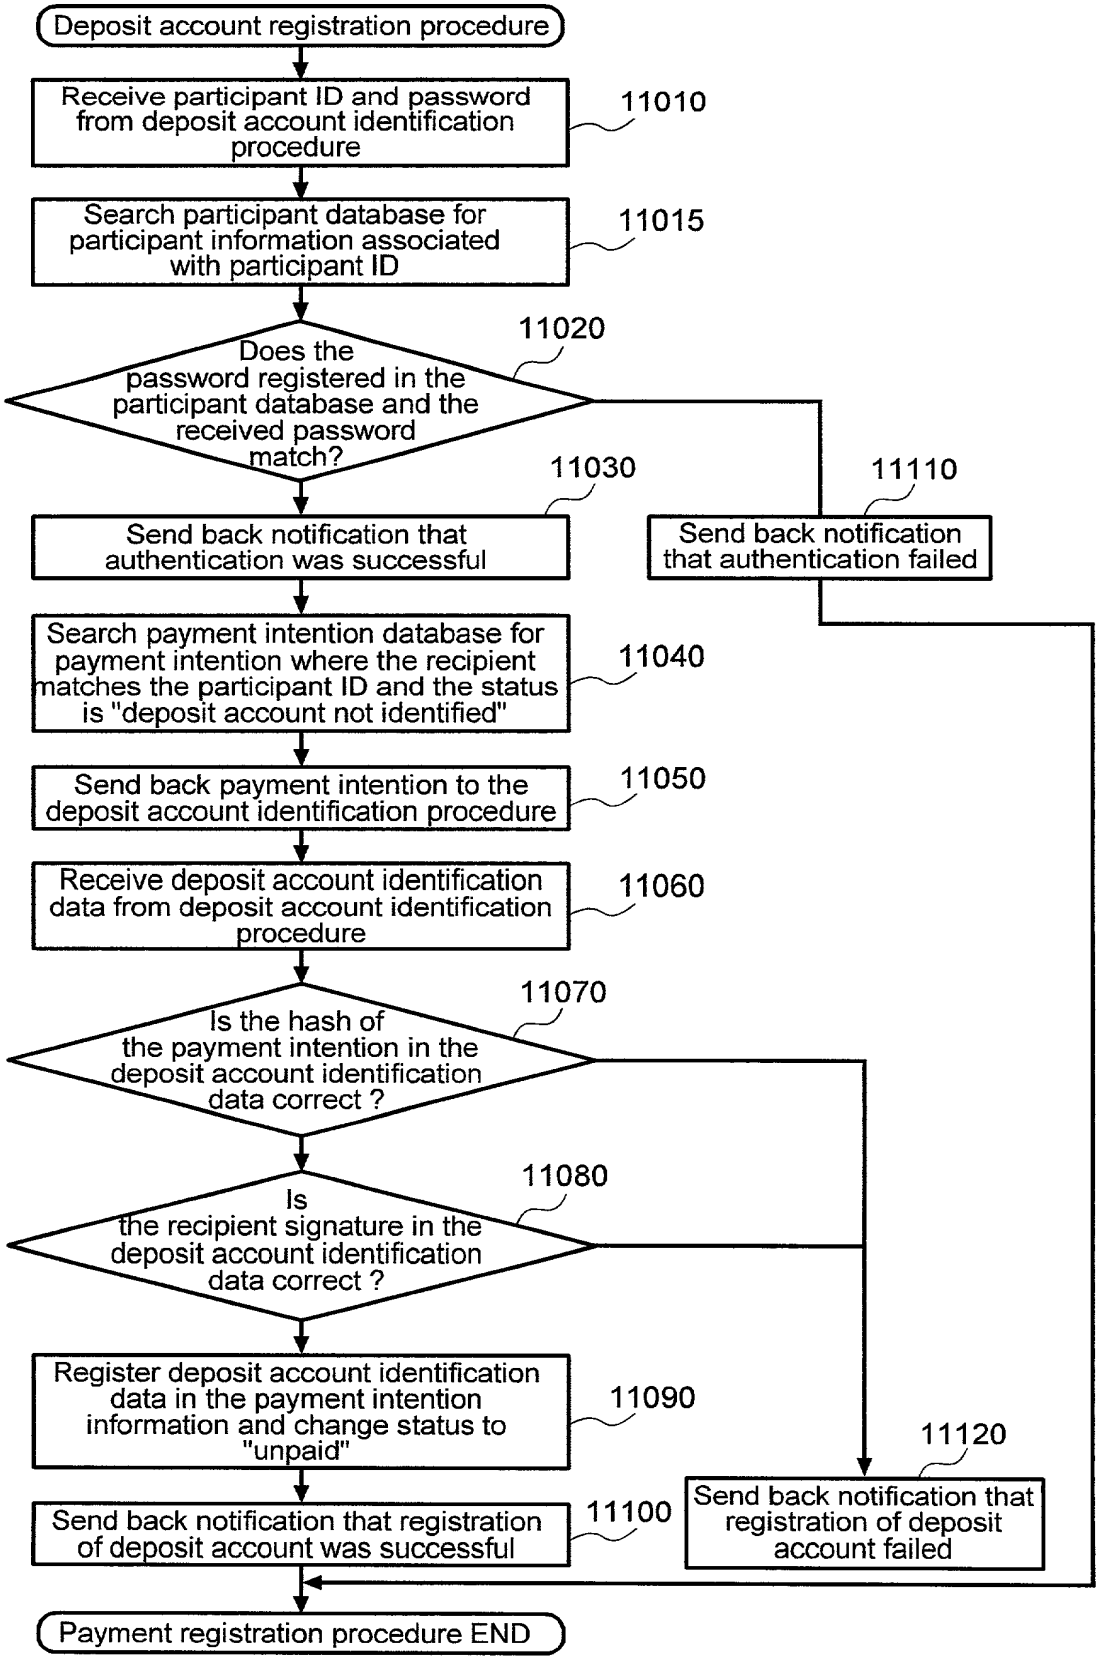
FIG.10



Payment intention registration/notification procedure start
Receive login data from payment intention creation procedure
10010
Search participant database for participant information associated with participant ID
10015
10020
Does password in participant information match the received password ?
No
Yes
10030
Send back notification indicating successful authentication
10100
Send back notification that authentication failed
Receive payment intention from payment intention creation procedure
10040
10050
Is the payer signature in the payment intention the correct signature ?
No
Yes
1055
Does the payer ID in the payment intention match the involved party ID ?
No
Yes
10060
Is the recipient ID in the payment intention registered in the participant database ?
No
Yes
Enter the payment intention into the payment intention database with a status of "deposit account not identified"
10070
Send notification of payment intention arrival to the recipient using the contact information field in the participant database
10080
10090
Send back notification that payment intention registration was successful
10110
Send back notification that payment intention registration failed
payment registration procedure End

FIG.11



Deposit account registration procedure
Receive participant ID and password from deposit account identification procedure
11010
Search participant database for participant information associated with participant ID
11015
Does the password registered in the participant database and the received password match?
11020
Send back notification that authentication was successful
11030
Send back notification that authentication failed
11110
Search payment intention database for payment intention where the recipient matches the participant ID and the status is "deposit account not identified"
11040
Send back payment intention to the deposit account identification procedure
11050
Receive deposit account identification data from deposit account identification procedure
11060
Is the hash of the payment intention in the deposit account identification data correct ?
11070
Is the recipient signature in the deposit account identification data correct ?
11080
Register deposit account identification data in the payment intention information and change status to "unpaid"
11090
Send back notification that registration of deposit account was successful
